

Conscious and Unconscious Processes in Human Desire

(2do llamado de Diciembre 2016)

Consignas

Read the text and answer the following questions:

A. Global comprehension

1. Read the abstract and select 5 keywords
2. What is the purpose of this research article
3. What gap in research do the authors mention?
4. What recommendations for future research do the authors make?
5. What are the implications of this research in terms of treatment?

B. Detailed comprehension

6. Define desire according to:
 - The authors of the present article
 - Field, Munafò and Franken
 - Tiffani
7. What is the main difference that the authors point out between desire and precursors of desire?
8. What is the main feature of EI theory?
9. What evidence do the authors provide to support the distinction between conscious and unconscious processes?
10. What findings of this research cannot be accounted for by neurobiological theories? Why is it important?
11. How do top-down processes modify the effects of bottom-up precursors of desire?
12. Explain the relevance of consciousness in EI theory?
